Explanatory notes

Purpose of indicator	<p>This indicator provides signatories with an opportunity to disclose which responsible investment/ESG-related regulations they report to. This indicator primarily aims to</p> <ol style="list-style-type: none"> 1. Give signatories an opportunity to indicate the extent of their required reporting on responsible investment practices. 2. Provide the PRI with a comprehensive understanding of the current and future reporting demands of signatories. 3. Collect data on international or regional reporting obligations of signatories to help the PRI develop its concept of equivalency for future iterations of PRI reporting. <p>There will be no positive or negative impact on signatories' assessment scores because of their answer to this question regardless of the number of reporting obligations they have. Responses will not be used as part of the assessment methodology.</p>
Additional reporting guidance	<p>Signatories should include ESG-related legislations they are subject to. If a signatory has commitments in multiple local jurisdictions with independent reporting requirements, then they should list all those they believe are noteworthy.</p> <p>Signatories are not required to list all legislations they report under by using the section labelled 'other'. Instead, they should select those they consider most relevant to the objectives the PRI has set out for this indicator. The PRI has provided a comprehensive (although non-exhaustive) list where signatories can choose from to include in the 'other' section. If a specific reporting obligation is not available, the value of signatories' responses will not be affected.</p> <p>Methodology behind response options:</p> <p>The legislations and regulations included in this indicator were selected from an extensive list of mandatory disclosure requirements compiled by the PRI. The number of legislations and regulations included for each region reflects both the number of signatories and the growing volume of reporting requirements in these regions.</p> <p>The selected legislations and regulations largely focus on reporting requirements that directly impact investment decisions.</p>

Explanatory notes

Purpose of indicator	<p>This indicator provides signatories with an opportunity to disclose which voluntary responsible investment/ESG frameworks they report to, outside of the PRI. This indicator primarily aims to:</p> <ol style="list-style-type: none"> 1. Give signatories an opportunity to indicate the extent of their voluntary reporting on responsible investment practices. 2. Provide the PRI with a comprehensive understanding of the current and future reporting demands of signatories. 3. Responses will not be used as part of the assessment methodology.</p>
Additional reporting guidance	<p>Signatories should aim to accurately reflect their reporting obligations to other voluntary organisations that publish responsible investment/ESG frameworks or standards. The option of 'other' is provided to allow signatories to highlight where reporting against frameworks or standards is conducted but not listed in options A to AD.</p> <p>Methodology behind selected response options:</p> <p>The voluntary frameworks and standards included in this indicator were selected from an extensive list of voluntary disclosure requirements compiled by the PRI. This list was developed by first identifying key themes that signatories may report against, drawing on prior PRI reporting responses.</p> <p>As stewardship, product/labelling, and codes of practice often emerge and evolve at the jurisdictional level, the list was designed to reflect a regionally diverse selection of frameworks that signatories are likely to engage with. For themes that are broader in scope, such as asset class or impact-focused frameworks and those addressing one or more sustainability issues, selections were based on frameworks that are globally applicable and have historically been recognised by the PRI and/or its signatories.</p>
